Chemistry Post-docs...

The tradition of having post-doctoral associates goes back to the fall of 1964 when *Y. Inoue* and *Y. Inoue* came to do research in inorganic chemistry.

One of the many criteria that the University is noting for admission to the Association of American Universities is the number of post-doctoral associates.

The Department currently has eleven. Their names are listed below together with the persons (*in italics*) who are providing support for their post-doctoral studies:

Y. Inoue and *Y. Inoue* (D, on An a);
A. ... and *...* (D, E
o); *...* (D, *o*, *a*,
E, *o*); *...* (D, E *o*
and *Za o o o*); Dr. K Arora (

new way of detecting the viability of cells using ultramicroelectrode *in vitro*, which is very promising for single cell investigation. I enjoyed and learned a lot working in Dr. Bard's lab. It is the most dynamic research group I have ever been with 21 members from 15 different countries at that time. Dr. Bard is an amazing scientist. I was constantly impressed by his enthusiasm, experiences, and alertness in science."

"To ensure my interests in teaching, I started my academic career as an *ad interim* assistant professor at The University of Texas A&M at Commerce. Commerce is an extremely small town with only two grocery stores. Fortunately, colleagues in the Chemistry Department were very nice. This nine-month experience further strengthened my interests and confidence in academic."

"Thus, I came to USF. My lab is currently under renovation with two graduate students and will be well equipped with up-to-date instrumentation in optical spectroscopy and electrochemistry. We are all excited about the chemistry that is going to happen in this lab."

REU News

REU is a research experience for undergraduates and was initiated as an NSF-supported summer program with a three-year grant, as noted in previous issues of *News*. The program was adapted to the fall and spring semesters starting with the fall of 2005 and some 70 students. The program will continue in the Spring semester with the Assistance of Dr. Patricia Muisener.

About campus...

and recently received a photograph taken at the 100th victory of the Women's Soccer team. They were honored for having established the first endowed scholarship for women soccer team members.

Head Coach Denise Shilte-Brown with team co-captains and the Martins

The Martins were presented with a soccer ball (see picture) that had been autographed by all the team.

What's New?

We are trying to keep track of our chemistry alumni, and it is a challenge because of the tendency for persons to move about. Would you be willing to help?

Please go to our Web page [<http://chemistry.usf.edu>] find "Important Links" Box and click on "Graduate Alumni". Find your name on the Ph.D., Masters, or Bachelor's list. The last list is a work in

progress, as are all, but even more so than the other two listings.
