Skvoretz, J. 1996. "CONNET: V4." Implements experiments on networks of conflict relations using a local area network of personal computers; manages subject-to-subject interaction and experimenter monitoring of interactions. Available in QuickBasic 4.0 for DOS platforms.

Skvoretz, J. 1996. "EXNET: V5" Implements experiments on networks of exchange relations using a local area network of personal computers; manages subject-to-subject interaction and experimenter monitoring of interaction. Available in QuickBasic 4.0 for DOSplatforms.

Skvoretz, J. 1993. "WPBIAS" Calculates frequencies of agreements between positions in exchange networks under several different specifications of tendencies to seek exchange. Available in QuickBasic 4.0 for DOSplatforms.

Skvoretz, J. 1992. "EXNET V4." Implements experiments on networks of exchange relations using a local area network of personal computers; manages subject-to-subject interaction and experimenter monitoring of negotiations. Available in QuickBasic 4.0 and requires Novell's database Btrieve.

Skvoretz, J. 1990. "BNETALGA and BNETALGB." Generates communication networks subject to specifiable biases in the formation of ties identified in the theory of random and biased nets. Available in QuickBasic 4.0 and TurboPascal for DOSplatforms.
