

# SPECIAL ENLIGHTENMENT WORKSHOP SERIES

## Neurodiversity: Designing Inclusive Learning Environments

TUESDAY, APRIL 25, 2023  
12-1 PM (MICROSOFT TEAMS)

Neurodiversity refers to the natural variations in human brains and behaviors. It includes conditions such as autism, ADHD, dyslexia, and Tourette syndrome. Designing inclusive learning environments means creating spaces where all learners can thrive and succeed. This workshop will explore strategies for creating neurodiversity-friendly classrooms and workplaces, including accommodations, assistive technology, and universal design principles.
