## ISDS Department Statement concerning the qualifications & credentials of faculty to Teach Management Program Courses Developedand approved by ISDS Faculty, September 2019

From the original creation of this department 1984, the goal was to provide coursework and research coveraged rawn from a multidisciplinary continuum of academic areas whose common focus was the effective utilization of management skills to transform business outcomes facilitate these goals we offer courses in relevant areas that include but are not limited to Principles of Management, Organizational Behavior Analysis, Human Resource Management, Negotiations, Leadership, International Management, People Analytics, Creativity, Collaboration and Sustainability

The strategyof the ISDS Departmenthasbeento incorporate these areas into a series of course offerings and programs in Management that urther the science and application management skills in the business world in terms of being effective leaders and decisions make icting employee behaviors and its effect on organizational bottom lines, creating successful relationships with employees and associations from different cultures, and effectively uitilizing the power of creativity and teams to transform businesses

Faculties ecruited for positions in the ISDS Departmentare chose on the basis of their academic background none or more of these fields so as to facilitate this multidisciplinary approach to our curricula and, as a result, current faculty have doctoral degrees in many interrelated disciplines including organizational behavior, human esource management industrial forganizational psychology, leadership, and social psychology

Facultyteachingundergraduateoursesare required to have a master's degree with 18 hours of graduatework in the field they are teaching or a related biscipline such as organizational behavior, labor and industrial relations, industrial/organizational psychology, human resources, communications, leadership, sociology, and psychology.

Facultyteachinggraduatecoursesarerequired to have a doctoral/terminal degree in management or a related discipline such as organizational behavior, labor and industrial relations industrial/organizational psychologlyuman resources, communications, leader stripiology, and psychology. The isciplines listed above are viewed as related disciplines of each other for credentialing graduate faculty. As these disciplines are very praction tended, in exceptional circumstance, sworking professionals with significant work experies in the field with Masters degree can be recruited to teach specific Master's level
