
Education

Ph.D. The University of Rochester, Rochester, New York
M.P.H. West China University of Medical Sciences, Chengdu, Sichuan
M.D. West China University of Medical Sciences, Chengdu, Sichuan

Professional Appointments

Director, Positive Aging Lab, University of South Florida, Tampa, FL, 2018-
Research Associate, Tampa General Hospital, Tampa, FL, 2019-
Associate Professor, School of Aging Studies, College of Behavioral & Community Sciences,
University of South Florida, Tampa, FL, 2010-
Assistant Professor, Graduate Program in Public Health, Department of Preventive Medicine,
Stony Brook University Medical Center, Stony Brook, NY, 2004-2010

Professional Affiliations

American Association for the Advancement of Science (AAAS)
American Public Health Association (APHA)
Gerontological Society of America (GSA)
International Society for Pharmacoeconomics and Outcomes Research (ISPOR)

Grant Review Activities

Panel Member, Rural Health Research Center Cooperative Program, Office of Rural Health
Policy, Health Resources and Services Administration (HRSA), U.S. Department of Health and
Human Services, 2008

Panel Member, NIH Challenge Grants in Health and Science Research, 2009
Panel Member, Affordable Care Act Personal and Home Care Aide State Training (PHCAST)

Program, Health Resources and Services Administration (HRSA), U.S. Department of Health

Psychological Medicine
Quality of Life Research
The Gerontologist

Honors and Awards

Pre-Doctoral Fellowship, University of Rochester Medical Center, 1999-2001

Nobuo Maeda International Research Award, American Public Health Association, 2002

Most Outstanding Abstracts, AcademyHealth, 2006

James G. Zimmer New Investigator Research Award, American Public Health Association, 2006

NSF/USF I-CORPS Fellow, 2016

Exceptional Reviewer, *Journal of Rural Health*, 2013-2016

Fellow, Gerontological Society of America 2022

Research Grants

Evidence-Based Care Transitions Intervention with Peer Support to Reduce Racial Disparities in Hospital Readmissions (PI: Conner) 2021-2023

Patient-Centered Outcomes Research Institute (PCORI) AD-2019C1-16066, \$2,500,000

The goal of this project is to conduct a three-armed randomized controlled trial of Care Transitions Intervention (CTI) alone, CTI + Peer Support, and usual care to reduce 6-month readmissions in a high-risk minority sample of African Americans and Latino/Hispanics age 60+ who are living with a chronic illness.

Increasing Access to Smoking Cessation via Video Groups (PI: Marhefka) 2019-2024

National Cancer Institute (NCI) R01CA243800, \$2,900,000

The goal of this project is to determine whether a group-based video-conferencing smoking cessation program for people living with HIV is efficacious in biochemically-confirmed point prevalence abstinence as compared to an attention control condition delivered via group-based video-conferencing.

Building Dementia Care Network and Community Capacity for Older Asian Immigrants with

C O R P t y o
c .
o \$

intervention to reduce behavioral expressions among persons living with dementia, and improve sleep, reduce stress among family caregivers.

Palliative Care Education in Assisted Living for Care Providers of Residents with Dementia (PI: Dobbs) 2019-2021

Florida Department of Health, Ed and Ethel Moore Alzheimer's Disease Research Program Grant No 9AZ26

The goal of this project is to conduct a cluster randomized controlled trial (cRCT) of palliative care education intervention among 225 persons with dementia in 12 assisted living facilities to increase appropriate hospice referral, improve pain assessment and documentation of advance care planning.

Heterogenous Disability Modeling and Long-Term Care Planning for the US Older Adult Population (PI: Li) 2018-2021

National Science Foundation (NSF) #1825761, \$261,055

The goal of this project is to develop a nursing home staffing needs decision support system by using two-stage stochastic programming model and efficient numerical optimization algorithms. The resulting system will inform practice and policy in new tools to promote efficient resident-centered staffing planning and improve quality of care.

Efficacy of MBSR Treatment on Cognitive Impairment among Breast Cancer Survivors (PI: Lengacher) 2015-2019

National Cancer Institute (NCI) R01CA199160, \$2,800,000

The goal of this project is to determine in a randomized controlled trial whether the MBSR program is more effective than the Breast Cancer Education Support program or a Usual Care regimen in ameliorating cognitive impairment among breast cancer survivors.

Patient Outcomes of a Self-care Management Approach to Cancer Symptoms: A Clinical Trial (PI: Mcmillan) 2013-2016

Patient-Centered Outcomes Research Institute (PCORI) 4025, \$2,000,000

The goal of this project is to examine the effectiveness and cost-effectiveness of a symptom self-care management intervention on patient-reported outcomes in cancer survivors.

Efficacy of Home-Based Self-Management for Chronic Fatigue (PI: Friedberg) 2012-2014

National Institute of Nursing Research (NINR) R42NR010496, \$700,000

The goal of this study is to evaluate the cost-effectiveness of a home-based self-management program for people with chronic fatigue.

Influencing Employer Benefit Purchasing Behavior (PI: Rost) 2009-2012

National Institute of Mental Health (NIMH) R01MH076277, \$2,600,000

The goal of this study is to investigate the impact of evidence-based presentations regarding the

The goal of this study is to evaluate the cost-effectiveness of a telephone-based cognitive behavioral therapy as compared to face-to-face CBT for African-American dementia caregivers with depression.

Fatigue Self-Management in Primary Care: Efficacy, Credibility, and Economics (PI: Friedberg) 2008-2011

National Institute of Nursing Research (NINR) R01NR010229, \$920,000

The goal of this study is to evaluate the cost-effectiveness of cognitive-behavioral therapy in people with chronic fatigue in primary care.

Evaluation of a Medical Home Model for Medicare Beneficiaries a

\$50,000

The goal of this study is to simulate the impact of various medical eligibility criteria on the outcomes of a health promotion and disease management intervention among frail Medicare beneficiaries with multiple chronic conditions.

Evaluation of the Impact of the Girl Scouts Asthma Awareness Patch Program (PI: Meng) 2009-2010

Asthma Coalition of Long Island, \$10,000

The goal of this project is to evaluate the impact of a national asthma awareness education campaign on asthma knowledge and awareness among Girl Scouts members.

Innovative Teaching Approaches to Promote Active Learning, Presidential Mini-Grants for Innovative Teaching Projects (PI: Meng) 2008-2009

Stony Brook University, \$10,000

The goal of this project is to test the feasibility of two innovative approaches to integrate the teaching of biostatistics theory and hands-on skills of statistical analysis by promoting faculty collaboration and using an Audience Response System.

Impact of a disease management intervention on the components of physical functioning among Medicare beneficiaries (Co-PI: Eggert) 2007-2008

Office of Rural Health Policy, Health Resources and Services Administration (HRSA), \$50,000

The goal of this study is to evaluate the effect of a disease m
