

## Autonomous and Connected Vehicles

at the Department of Transportation

Marcellino Marchese

At the Department of Transportation, we have a goal to

improve the safety and efficiency of our transportation system. We are committed to the development and deployment of autonomous and connected vehicles. We are working with industry and academia to develop the technology and standards needed to make these vehicles a reality. We are also working to ensure that the public is properly educated and that the necessary infrastructure is in place to support these vehicles. We are committed to a safe and efficient transportation system for all.
